

# PLATFORM FOR GDPR COMPLIANCE INTEGRATION

## ABOUT PROJECT

Since GDPR Act was enforced by the EU Commission, our client in Ireland saw the need of having a platform that offers information on GDPR policies, and the process of becoming GDPR compliant. They required an online platform to track, monitor and offer services in GDPR compliance.

## THE REQUIREMENT

- Web application that offers services of GDPR compliance to businesses
- Centralised cloud-based system for management & monitoring
- Easy-to-use backend & dynamic user interface
- Ability to monitor and track customer requests
- Audit module for tracking required compliance regulations
- Multi-tenant storage format for data from different platforms

The General Data Protection Regulation

“ We built a solution that enables organisations to keep a close watch over the user data and ensures adherence to the GDPR regulations. ”

# PLATFORM FOR GDPR COMPLIANCE INTEGRATION

PROTOTYPING - DEVELOPMENT - SUPPORT

## THE CHALLENGES

- **Design thinking** for creating dynamic user interface
- Duration of solution **delivery** was short due to GDPR Act
- High-end **security** was requirement for data security
- Gaining a complete understanding of the GDPR Act even before it was in effect.

## THE EFFECT OF THE SOLUTION

Access and mapping rights to multiple companies

Secure connection with data encryption for high security

Data assets for mapping data and identifying potential risks

Track, monitor and store incidents of data breaches
